

New York—The Next President.

The importance of the vote of New York in the next presidential election is felt to be so great, and the necessity of securing it so imperative, that the papers are full of suggestions on the subject. These are of various sorts, but all look to the end of having that vote counted on the side of the man who makes the given suggestion. Of course everybody knows that it is this consideration which secured to Mr. Tilden the Democratic nomination in 1876, and which gives him all the strength he now has, let this be little or much. It is this consideration that makes the Washington Post clamor for the nomination of Mr. Seymour, a gentleman who has repeatedly declined to be elected Governor of New York—who could have been elected to that office last week if he had accepted the nomination which in an informal way was tendered to him last spring—and who can thoroughly win the Tilden and Kelly men at any time, but whose health is so bad that it is hardly to be presumed that any objective considerations could induce him to agree to run for President. It is the same consideration that induces Mr. Bayard's friends to declare so confidently that he could carry the Empire State. It is the same consideration that has called forth the combinations of "HENDRICKS and PORTER," "CHURCH and McDONALD," "TILDEN and McDONALD," "BAYARD and McDONALD," "SEYMOUR and McDONALD," &c., &c.

But the latest of all the plans for securing the vote of New York is that set forth in the following paragraph from the Philadelphia Times:

"It has been proclaimed by desperate partisans that the Republican Governor and Legislature of New York will attempt to defeat the anticipated verdict of the Empire State on the presidential electors by the choice of presidential electors by the Legislature. It is in the power of the Republicans of New York to do so, as they have an unscrupulous partisan crew to fill the gubernatorial chair, and a two-thirds vote in both branches of the Legislature ready to obey the mandate of Conkling; but the attempt to cheat the people of the first State of the Union out of their verdict in the selection of a President, by a Legislature chosen under a violent partisan gerrymander of the districts, would lose the Republicans every debatable State in the North. It is regarded as a revolutionary effort to make a discredited and now broken senatorial leader the dictator of the presidential battle, and the Republicans would be defeated by their own insanity, even with the vote of New York stolen from the people."

Scribner's Periodicals.

Messrs. SCRIBNER & CO., of New York, have sent us through Messrs. WOODHOPE & PARHAM, of this city, bound copies of St. Nicholas and of Scribner's Monthly. The binding is good, and the letter-press unexceptionable.

St. Nicholas is the best illustrated magazine for children that is published in the world. So we are inclined to think. It is edited by MARY MAPES DODGE.

Scribner's Monthly is one of the best of the American periodicals, if not the best. It has become wonderfully popular of late years even in the South, in spite of several articles to which our people justly took exception.

South Boston, November 10, 1879.

Editors Dispatch: It will be a satisfaction to some of your readers to know the former party relations of the members-elect of the next Legislature. How many have heretofore acted with the Conservative party, and how many with the Republicans. If you know, please tell us in your next issue.

HALIFAX.

CARROLL COUNTY.—Martin Dalton (Conservative) beats Amos Cox (Readjuster) 89 votes.

Mr. Dalton's majority may seem quite small, but it must be recollected that there were three debt-paying candidates in the field, and that a large number of Conservatives, confident of victory, remained at home on election-day, while the Readjusters to a man went to the polls. Dickenson's majority for Senate, 216.—Hillsville Virginian.

We learn that in the counties of Powhatan, Cumberland, Gloucester, Chesterfield, and Nottingham delegates have been appointed to the Farmers' Convention which meets in Petersburg on the fourth Tuesday in November. All the counties are desired to appoint delegates; as business of importance will come up.

The Indians at Williams Lake, British Columbia, are reported starving. Their chief has been translated for publication a pathetic appeal to her Majesty, reciting how they have been deprived of their lands and means of livelihood by whites, and asking relief, saying his young men will not starve in peace.

Thomas Clegg, accused of setting fire to the Boston College, was arrested at Jacksonville, Fla., Friday night, and brought to Wheeling, the people in the neighborhood of Wellsburg having threatened to lynch him. Dr. Parkinson, a prominent citizen of Wellsburg, has been arrested as an accessory.

BORETOUR COUNTY.

FRANKFORD, November 6, 1879. Editors Dispatch: The Readjusters carry this county by a small majority. This by no means expresses the sentiments of the people here upon the subject of the State debt. The property-holders of the county are, as elsewhere, for the McCulloch bill, in overwhelming numbers. A majority of the voters of this county are in favor of the McCulloch bill, and but for an unfortunate split in the Convention which nominated the candidate for the Legislature, would have so decided it. I would have sent you this information before, but for obvious reasons. It is a worthy citizen, who would have well represented the county, but he was not the people's choice. His nomination was the effect of a very hasty compromise in the Nominating Convention between the supporters of two popular candidates, Messrs. W. J. Johnson and George H. Watterston as editor.

"You pays your money and you takes your choice."

A GLOOMY OUTLOOK IN VIRGINIA.—Gentlemen from the North who have been engaged for some time in developing mining interests in Virginia report that the result of the late vote on the debt question in that State is proving a sad blow to the State. They have already received notice that capitalists who had contemplated early investments have abandoned their projects, while some who have started in several ventures in the State are considering how they can best wind up their affairs and return to the North.—Washington telegram—Baltimore American.

It is bad enough; but let us hope not so bad as all that. Unquestionably the defeat of the friends of an honest settlement of the public debt is calculated to give Virginia a dishonored name, and will be thrown up to her sons the world over for years and years to come. Mississippi still feels the disgrace of her repudiation measures as sensibly as she did thirty years ago.

But wait. The Legislature-elect will not contain a majority of members pledged to repeal the McCulloch act.

A goodly number of the colored people—probably half—of the Debt-payers in this county (Pulaski).—Northern People. And of course the Conservatives carried the county. If only half the negroes had voted with the Debt-Payers in every county, there wouldn't have been a dozen Readjusters in the House of Delegates.

In looking over the returns from the First, Second, Third, and Fourth districts, we need no interpreter to understand that the Readjusters were enabled to elect their candidates in those particular localities solely by the aid of the colored Republicans. Norfolk Ledger.

"So say you all, gentlemen?"
